**SUMMARY**

I am a fellowship trained knee and a sport medicine surgeon with extensive experience in knee ligament reconstruction, primary/revision knee arthroplasty, patellofemoral joint instability and multiligament reconstruction. I am a visiting professor in the Faculty of Health and Life Sciences in Northumbria University and a director of OASIR Research group ([www.oasir.co.uk](http://www.oasir.co.uk)). The research work at Northumbria University have successfully lead to accomplishing many trials and research projects. In the past 10 years I have also developed an extensive research interest in patellar instability and tendinopathy. Through my affiliation to Northumbria and the support of the academic staff I have published more than 88 scientific papers, book chapters and articles. I am also the co-author of two of the best selling Postgraduate Orthopaedic books in the UK.

After finishing type one specialist registrar training in Scotland and knee fellowship in Sydney and Newcastle in 2005, I was invited to become a consultant trauma and orthopaedic surgeon at the QEH NHS trust in Gateshead. The orthopaedic department in Gateshead NHS trust was severely underdeveloped and had serious issues with attracting high quality consultants and trainees. In my role as the head of department I succeeded in raising the standard of the department and make it one of the major success stories in the northeast.

Since 2010 I have been dedicating a significant amount of my time to humanitarian work with NGMV medical charity ([www.ngmvcharity.co.uk](http://www.ngmvcharity.co.uk)) and more recently with the International Committee of the Red Cross (ICRC) ([www.icrc.org/en/where-we-work/middle-east/lebanon](http://www.icrc.org/en/where-we-work/middle-east/lebanon)) at their war wounded trauma reconstruction centre in Tripoli/Lebanon.

In August 2015 he was appointed as a knee surgeon at the Academic Surgical Firm, South West London Elective Orthopaedic Centre (SWLEOC).

# Newcastle Gateshead Medical Volunteers

Voluntary Orthopaedic Surgery Home and Abroad

## Charity Work

Newcastle/Gateshead Medical Volunteers (NGMV) was founded by a group of healthcare professionals from the North East of England including orthopaedic surgeons, anaesthetists, nurses and physiotherapists.

We are working in partnership with the Barzani Charity Foundation (BCF) and Nechirvan Health Aid Office in the Kurdistan Region of Iraq to provide voluntary medical care to the population of Iraq.

The Nechirvan Health Aid Office and Barzani Charity Foundation provides social, cultural and humanitarian aid in Kurdistan to the people who need it most – without discrimination and regardless of their belief or ethnicity. They focus on projects that help rebuild the shattered lives of the many thousands of displaced people in this devastated society. The BCF's campaigns target sectors that really make a difference by providing economic and financial contributions, emergency relief, educational development as well as health and social care.

NGMV are committed to making at least 2 trips per year to delivery musculoskeletal and Orthopaedic services to local people in this area.
